

The Dubarry Footwear Protection Range

Cleaner

- Aids in the removal of dirt and other residues
- Prepares leather for proofing and conditioning

Suitable for all types of footwear

Conditioner

- Conditions the leather restoring its original appearance and also offering water repellency

Suitable for all smooth leather

Protector

- Restores a water repellent finish, offering high stain resistance

Suitable for all nubuck and suede leather

Love your Dubes...and they'll love you back

Use Footwear Cleaner
on all parts
of the boot

**Apply Footwear
Protector Spray**
to the nubuck and
suede leathers

Apply Conditioner
to the smooth leathers

Dubarry Leather Cream

In addition to the other three care products described in this guide, Dubarry strongly recommends for well worn footwear, use of our **Leather Cream** in the **flex** part of the foot. This will help protect, preserve and soften the leather.

IMPORTANT: yard manure and waste liquids can be very corrosive to leather. To prolong performance and protection for your Dubarrys, always scrub them with a brush and rinse with fresh tap water after exposure.

The Leather

The leather used by Dubarry for its Country boots is specially treated and absorbs less moisture and requires 70% less time to dry compared to other leather types. It also ensures that your Dubarry boots will always be soft and supple. A little maintenance is required and provides a longer lifespan for your valued Dubarry boots. The leather used for the Dubarry boots is the full cowhide with all its naturally occurring imperfections, providing the boots with a rugged "worn" look.

Cleaning the leather

All leather needs care. Make sure the leather is cleaned and dried properly before using any care products. Heavy mud and dirt should be removed initially under the tap with water and a brush. Make sure that yard manure and waste liquids are thoroughly rinsed off immediately with fresh tap water. The same applies to seawater and/or salt.

Drying the leather

Allow the boots to dry naturally before any further treatment. Never use artificial heat or leave in proximity to an open fire. For best results, air dry for a minimum of 48 hours.

3. Protector

Dubarry Protector was the world's first water-based fluorochemical spray for footwear. The spray, in addition to restoring a water-repellent finish, offers a high-resistance to oil and stains. It is extremely durable and will work on all types of nubuck and suede leather.

Instructions:

Suitable for all nubuck and suede footwear.

Keep out of reach of children.

Clean footwear with Dubarry footwear cleaner and allow to dry overnight. Spray protector over the nubuck/suede. Allow five minutes between applications. Wipe away any excess from soles and welts. Again allow footwear to dry overnight for best results.

The Dubarry Footwear Protection Range

1. Cleaner

The first part of the Dubarry care programme uses our scrub Cleaner, which is developed using skin care technology. It contains a light beaded material, which will aid in the removal of dirt and other residues. It leaves the footwear in prime condition ready for proofing and conditioning.

Instructions:

Suitable for all types of footwear. Keep out of reach of children

Brush all loose dirt from footwear and lightly rinse with water. Apply gel using a sponge or cloth. Rub over footwear, rinse thoroughly. Avoid over soaking. Leave to dry naturally over night before treatment with conditioner or protector.

2. Conditioner

Dubarry Conditioner is water-based fluorochemical. It will condition the leather bringing it back to that new look while also offering water repellency and high levels of oil and stain resistance. It is of particular benefit to smooth and full grain leathers.

Instructions:

Suitable for all smooth and full grain leather.

Keep out of reach of children.

Clean footwear with Dubarry footwear cleaner. Apply conditioner to dry leather using a soft cloth, rub sparingly into the surface, applying as many coats as necessary.

4. Dubarry Leather Cream

In addition to the other three products described above, Dubarry strongly recommends for well worn boots the use of our Leather Cream, especially in the flex part of the foot. This will help to protect, preserve and soften the leather.

Instructions:

Suitable for all smooth and full grain leather.

Keep out of reach of children.

Firstly clean your boots as described above and allow them to dry thoroughly. Apply cream sparingly with a soft cloth to the smooth leather only, especially in the flex part of the foot. You may also use on the smooth leather in other parts of the boot e.g. the bands. However do not apply to the nubuck and suede footwear sections of the upper part of the boots, where you should only use Footwear Protector Spray.

Cautions when using all footwear care products:

Irritating to eyes. Keep away from areas of ignition. Do not smoke around products. Vapours may cause dizziness and drowsiness. Do not breathe spray. Avoid contact with eyes and skin. Use in a well ventilated area.

In the case of contact with eyes, rinse immediately with cold water and seek medical advice.

Keep containers tightly closed.
